

FITTING INSTRUCTIONS FOR CP0018BL/WH CRASH PROTECTORS HONDA VTR FIRESTORM

Please note that the way the kit is packed does not necessarily represent the way of mounting to the bike

Please note that in cases where kits are packed with rubber washers holding the components onto the bolt – *the rubber washers should be thrown away!*

- Undo fairing both sides
- Gently pull forward
- Undo engine bolt
- Mark end of engine bar with white paint/ tippex
- Put fairing back
- Push marked end up against fairing
- Repeat for the other side
- Once both sides are marked, remove fairing completely
- Pilot drill on centre of marks from inside edge of fairing both sides
- Re-fit fairing, check holes in correct position
- Using 16mm tank cutter/cone cutter
- Carefully drill holes outside edge inwards.
- Take a sharp knife and de-burr holes
- Take R & G kit
- Remove bobbins
- Remove the chunkier bar end (22mm spanner)
- Slide bar through engine bolt position
- The bar-end with the 14mm A/F dimension should fit on the recess of the engine on the Nearside.
- Re-fit other end. Tighten bolt until you feel some compression from inside the protector. Turn a little more so that you feel the compression increase slightly. Then apply a quarter turn. Do not overtighten as damage can occur to the bike. Do not exceed 40nm of torque. Refit fairing.
- Bar ends should just come through holes
- Refit bobbins.

CONSUMER NOTICE

The catalogue description and any exhibition of samples are only broad indications of the Products and R&G may make design changes which do not diminish their performance or visual appeal and supplying them in such state shall conform to the order. The Buyer acknowledges no representation or warranty (other than as to title) has been given or will apply to the Products other than those in R&G's order or confirmation and the Buyer confirms it has chosen the Products as being of merchantable quality and suitable for its particular purposes. Where R&G fits the Products or undertakes other services it shall exercise reasonable skill and care and rectify any fault free of charge unless the workmanship has been disturbed. The Buyer is responsible for ensuring that the warranty on the motorcycle is not affected by the fitting of the Products. On return of any defective Products R&G shall at its option either supply a replacement or refund the purchase money but shall not be liable if the Products have been modified or used or maintained otherwise than in accordance with R&G's or manufacturer's instructions and good engineering practice or if the defect arises from accident or neglect. Other than identified above and subject to R&G not limiting its liability for causing death and personal injury, it shall not be liable for indirect or consequential loss and otherwise its liability shall be limited to the amounts paid by the Buyer for the Products or the fitting or service concerned. These terms do not affect the Buyer's statutory rights.

R&G RACING RETURNS POLICY (NON-FAULTY GOODS)

Returns must be pre-authorised (if not pre-authorised the return will be rejected). Goods may only be returned direct to us if they were purchased direct from us (customer must prove if necessary). Otherwise to be returned to original vendor. Goods must be in re-sellable condition, in the opinion of R&G Racing. All returns are subject to a 25% restocking and handling fee (25% of the gross value exc. P&P – at the prevailing price at time of purchase). The customer must pay any and all carriage charges. No returns of discontinued products, unless within 14 days of purchase. This policy does not affect your statutory rights and does not refer to faulty goods.

**INSTRUCTIONS DE MONTAGE POUR CP0018BL/WH CRASH PROTECTORS
HONDA VTR FIRESTORM**

LA PRESENTATION DES PIECES R&G DANS L'EMBALLAGE N'EST PAS TOUJOURS IDENTIQUE AU SENS DE MONTAGE.

Merci de noter que dans le cas où les protections sont assemblées avec une bague en caoutchouc, merci de bien vouloir le retirer lors du montage des pièces sur la moto.

- Enlever les carénages
- Retirer le carénage délicatement vers l'avant
- Enlever la vis de fixation moteur.
- Marquer à l'aide de peinture ou de tippex la tête de la barre de fixation moteur.
- Remettre le carénage
- Pousser la vis peinte contre le carénage.
- Refaire la même opération pour le côté opposé.
- Lorsque les deux côtés sont marqués, Enlever le carénage.
- A l'aide d'un forêt de 5-6 mm, percer le carénage en prenant le marquage précédent comme point de repère.
- Remettre le carénage et vérifier le bon alignement.
- Enlever le carénage. A l'aide d'une scie cloche de 16 mm, percer le carénage en prenant le trou de 5 ou 6 mm comme repère. (note: percer le carénage de l'extérieur vers l'intérieur)
- Enlever la barre de fixation d'origine.
- Glisser la barre R&G
- Placer et serrer ensuite les pièces de fixation des tampons R&G, la partie de diamètre 14 mm sera à placer dans le cadre. (pour le côté gauche)
- Remettre le carénage.
- Mettre les tampons R&G sur la moto.
- Serrer la vis jusqu'à ce que vous sentiez la compression à l'intérieur du tampon, Faire encore un quart de tours.
- Ne pas trop serrer, couple de serrage Maxi 40nm.
